

Label	h_c
Dimensions	$ML^0t^{-3}T^{-1}$
SI Units	$\frac{\text{kW}}{\text{m}^2\text{oC}}$
Equation	$h_c = \frac{2k_ch_b}{2k_c + \tau_ch_b}$
Description	<p>h_c is the convective heat transfer coefficient between clad and coolant</p> <p>k_c is the clad conductivity</p> <p>h_b is the initial coolant film conductance</p> <p>τ_c is the clad thickness</p>
